New Crop Is Moving Fast

On Sept. 2nd 387,440 bushels of the 1930 crop had been shipped from Champion, while the amount in store in the elevators was estimated at 247,732 bushels. Adding the deliveries since Sept. 2, harvesting and threshing is considerably over half completed or the crop is under estimated at 1,000,000 bushels.

Freight traffic on this line has been very heavy of late, the fact that there has been no elevator blockade in spite of the very rapid delivery of the grain indicating the volume in which it has been handled by the railway.

Beaubien Bros. on the old W. Wannop farm, threshed over 30 bushels per acre from 70 acres of stubbled in crop. This would appear to be a record for this season.

J. M. Moffatt and G. McLean were at Brooks on Wednesday playing in the Vulcan band.

For Fish and Birds

For fish and birds I make this plea, May they be here long after me, May those who follow hear the call Of Old Bob White in spring and fall; And may they share the joy that's mine

When there's a trout upon the line, I found the world a wondrous place, A cold wind blowing in my face Has brought the wild ducks in from sea,

God grant the day shall never be When youth upon November's shore Shall see the mallards come no more; I found the world a garden spot, God grant the desolating shot And barbed hook shall not destroy

Some future generation's joy! Too barren were the earth for words If gone were all the fish and birds, Fancy an age that sees no more The mallards winging into shore; Fancy a youth with all its dreams, That finds no fish within the streams

Our world with life is wondrous fair, God grant we may not sweep it bare —Edgar A. Guest in Forest and Out doors.

Savoy Hotel Changes Hands

After being in charge of the Savoy hotel for some two years J. H. Graf disposed of his interest to E. Campbell, the latter taking charge on Sept. 1st. During his two years residence Mr. Graf had sponsored improvements both in the hotel and on the premises which made the Savoy one of the most popular hotels in the country, both accommodation and other conditions being of a character to bring every traveler in the country here on every possible occasion to spend the night or week end. Both Mr. and Mrs. Graf will have the very best wishes of all those who have enjoyed the hospitality of the Savoy during the time they have been in charge in any new venture they may undertake.

The new proprietor is well known here having preceded Mr. Graf in the management of the hotel, and during this period was responsible for completing many of the improvements which later made the house so popular, and he will naturally be generally acceptable to the public and will undoubtedly maintain the high reputation the Savoy has attained.

We have to ask advertisers to avoid bringing in copy for advertisements late in the week as it is practically impossible to issue the paper at any particular time unless this copy is in the office at least two days before the paper goes to press. It is possible to set all the new items at the first of the week, the last two days could be devoted to the advertising. As it is the news and advertising practically all reaches the office between Thursday and Friday noon. The result is that everything is done with a rush and naturally is far from well done. Try to get your ad. and news copy in early.

Mr. and Mrs. Jas. Ellis returned from Vancouver last Saturday. The trip was made to permit Mr. Ellis to recuperate from the effects of an operation and was highly successful, the patient gaining ten pounds in weight and recovering his old time robust health.

With all restrictions removed public meetings of every kind will again be in order. The strict observance of the quarantine regulations by the public and the patients no doubt contributed to the prompt disappearance of cases of infantile paralysis, all the patients recovering.

Champion consolidated school opens on Monday, September 8, with the following staff of teachers: Principal, R. I. Baker, B.Sc.; Miss A. M. Melrose, Miss Archer B.A., Miss B. McFall, Miss M. I. Cameron. The rural schools will be handled by the following: Yale, Miss M. Robinson; Fiteguard, Miss A. McNaughton; Sanderson, Miss M. Johanson.

H. E. Johnson has been ill for some time with an attack of sciatic rheumatism. His many friends are pleased with his steadily improving condition. George Mark is head nurse and under his ministrations the patient should make a prompt recovery.

Greater Value Than Ever Before "Clothes of Quality"

Berger Tailoring Co. have for many years specialized in tailoring fine clothes to measure. Their new Fall offerings are better than ever—in variety, in quality and in value. Choose your material now—and be ready for the Fall and Winter seasons with clothes that stamp you as a shrewd buyers and well-dressed man.

The NEW Firestone BALLOON for Speed with Safety

Most Miles
Per Dollar

FIRESTONE now announces another new tire—again built in advance of today's car requirements. This new Firestone Heavy Duty Gum-Dipped Balloon surpasses in strength, in toughness, in traction and in wear-resistance, any tire that even Firestone ever built before.

This new tire provides a wide margin of safety at any speed on any road. It has a deeper tread, extra sidewall thickness and scientific construction of alternating plies of live rubber gum and Gum-Dipped cords. Two extra plies of Gum-Dipped cords just beneath the tread absorb road shocks—Firestone engineers and design give you a wide margin of safety for fast driving.

At every Firestone Dealer's, you can see the new Heavy Duty Balloon by their expert demonstration and by the fact that it stands out against the shabby black sidewalls. See your nearest Firestone Dealer to day.

Periodic Health Examinations In The Future To Guard Against Unnecessary Illness

(By John Ingram)

Should doctors be paid for healing their patients? To this seemingly foolish question a friend of mine replied: "Certainly! That's what doctors are for!"

Do you remember the old, old fable about the way the Chinese pay their physicians? Only when the patient is well is the doctor paid. That the interests of patient and doctor are identical. Smart people, those Chinese! Today we are trying to work out some such system in the name of "Preventive Medicine." Today the attitude of the doctor towards disease is changing.

Vaccination against smallpox started that change. Before vaccination, doctors existed solely for the sick. With the coming of vaccination they began to prevent illness.

Vaccination has been followed by similar discoveries. It is now possible to "vaccinate" (the word wisely inexact medically, is correct in general sense) against diphtheria, scarlet fever, measles, infantile paralysis and other diseases. Almost every year sees another gain. Two additional diseases, namely, typhoid and cholera, are now preventable diseases. And another year the falling death-rate from tuberculosis proves that preventive medicine is effective in combating many of those ills of the flesh against which no specific has yet been discovered. The most significant revelation that has been given to the principle of preventive medicine has been the organization of public health departments. The function of every public health official is not to cure disease, but to keep the public healthy. And more and more this is becoming the function of the practicing physician, too.

What is to happen to the average doctor when—and if—we reach the ascendant position in which there are no sick people in the community? This state, thinks Dr. Gordon Bates who writes on the question in the current issue of the Canadian Public Health Journal, will be a most happy one. For instead of having thousands of sick to heal, he will have millions of well folk to keep well. Truly a more congenial, as well as a more profitable state of affairs to both doctor and patient.

Half of all the illness in Canada is preventable, he says, "and over 30 per cent. of our diseases are preventable." The direct cost of illness he places—from conservative estimates made by public health officials from coast to coast—at \$300,000,000.

He visualizes a day when a mother, instead of philosophically hoping that her offspring will have their share of children's diseases early and get them over with, will consult her family physician and arrange with him to have the children immunized against these diseases so that they won't have them at all. A much less expensive, less annoying, less dangerous procedure. He points out that though Canada has annually about 1,200 deaths from diphtheria, and 15,000 cases of it, preventive medicine could cut the toll of this disease by 90%—and that it fails to do so largely through ignorance or neglect of parents, since diphtheria is principally a disease of childhood.

"But what other phases are there to the adoption of preventive medicine by the general practitioner?" Dr. Bates asks. "One thinks immediately of the periodic health examination idea."

"Many illnesses which have resulted in death might have been prevented had the physician had the opportunity of acting in the incipient stage of the disease in question. An infected tooth or toothache, venereal disease or death; cancer, syphilis, tuberculosis may result in death because of neglect when the symptoms are slight, and these are only ex-

amples of conditions in which at present the physician too frequently has not the opportunity of exercising a preventive function. Over-eating, over-drinking, overwork, under-exercise, worry may present problems just as serious but the culprit seldom consults his medical adviser until Nemeses is upon him. The effect on sickness and death rates is obvious.

A year ago through the co-operation of the Canadian Medical Association and the Dominion Department of Health a standard form, designed for the use of the physician in the examination of the apparently well, was forwarded to every physician in Canada.

The ease for periodic health examination is so strong that unquestionably this procedure will be a most important part of the armamentarium of future practitioners. In the future to the end that unnecessary illness may be prevented.

"Important steps in the direction of making the application of periodic health examination practical have already been taken. A number of the leading health insurance companies have entered into a co-operative scheme with the Canadian Medical Association whereby certain physicians will have made available for them free medical examination by their own family doctors, or at least by members of their own choice, the life insurance companies paying the bill."

But the life insurance companies find periodic health examination such good business, as a life-prolonger for policyholders, that they are willing to pay for it! Which makes it look as though it were a good thing for one to walk round his family physician and say: "Doctor, look me over now and over my birthday from now on. Practices preventive medicine on me. I'll pay you handsomely to keep me well!" Clever people, those Chinese!

Value Of Agricultural Fairs

Postmaster-General Believes They Teach Practical Lessons

The Minister of Agriculture, Hon. Robert W. Wells, intends to assume a policy that will render justice to all parts of the country in aiding farmers. Hon. Arthur Sauve, Postmaster-General, said in an address given at the Three Rivers exhibition. He said he discussed the value of agricultural fairs which taught sane and profitable lessons showing the possibilities of the future. He said: "Our problems are many, and it is important that national education should be carried on in such a manner as to insure that all portions of the population contribute to its solution."

"We are experiencing an alarming crisis, which everybody will admit. Everyone must help. The governing bodies must play their part properly."

Clover Seed Prospects

Production Of Alsike Clover Better Than Quality Than Last Year

The Seed Branch of the Dominion Department of Agriculture estimates that the production of alsike clover seed for 1930 will be better in quality but with respect to colour and purity than last year's crop. Output of production is not expected to exceed one-third of the 1929 crop, when 70,000 tons of seed were harvested. The site seed market is not overly promising at the present time. Better prospects are reported for red clover seed with practically no carry-over from last year and 1930 acreage about 60 per cent. below normal. An increased acreage of alfalfa being saved for seed is reported.

Montreal Unemployed

Montreal at present has between 21,000 and 23,000 unemployed, with another 10,000 to 15,000 working but under three days a week, according to reports from Labor unions reaching the city hall, it was announced by Alfred Mathieu, member of the executive committee. The information will be passed on to Hon. Gordon Robertson, Minister of Labor, who is compiling data on unemployment throughout the country.

Victoria Tower, London, 420 feet high, is said to be the highest spire in the world.

Causes Of Drought

Scientists Say Storm Track Has Shifted Northward

Increments of meteorological information are for better compensation. Two or three crops will insure the success of this summer's exceptional drought, yet that information is about the only feature of the weather which can be set down on the profit side of the ledger. The last comparable condition, says the New York Herald-Tribune, was in 1874, when but few weather observers were maintained and anything like the present world maps of weather was still a dream. This summer for the first time weather elements have before them the drooping maps of the present world of what is happening to the oceans and air currents and other brewers of storms or droughts. Superficially, the answer to the query "Why this drought?" is straightforward. There has been persistent high air pressure over most of the United States. This has kept out the moisture-laden winds from the oceans on both coasts, for winds tend to blow outward from high pressure areas, never inward toward them.

The real problem, however, is the cause of this persistent high pressure. It is too soon to read this with assurance. The European weather maps, for example, come by mail and are ten days to two weeks late in American laboratories. Yet one fact can be discerned from the maps of this country. What is called the storm track has shifted northward. Most of the low pressure areas are provided by the cyclonic storms which sweep across the continent from the Pacific to the Atlantic every few days in winter and at longer intervals in summer. These storms cause moving areas of low pressure; the low pressure draws winds both from the north and the south; these winds mix; the cold north winds precipitate the moisture from the warmer southern ones. That, in a sentence, is the cause of America's rain. Ordinarily these recurring storm waves follow a path which crosses the northern third of the United States. Since July 20 not one of these storms has done so. They have not vanished, inspection of Canadian records shows. They have been shifted farther north than usual, crossing the Hudson Bay region and providing the more ample rains which Canada has received. The wheat and corn belts of the United States have been left south of the storm track untouched by the moisture which might have brought rain.

A step back of this line another question. Why has the storm track swung farther north? Here authorities differ, but Herbert Johnston, weather forecaster of unofficial status but of substantial success, has an idea. The ultimate culprit, he believes, is the moon, which in its swings southward and northward in successive decades affects the tidal motions of the ocean and thus the winds on land. The cycle of moon motions which now is occurring repeats, Mr. Johnston points out, that of 1874, and 1874 was also a year of drought. As a scientific guess, this is perhaps the best now available. But much research remains to be made before a certain conclusion can be reached.

All He Knew

The patient teacher had explained some of the modern habits in common phrases and talked much of slang and war and radio and what not.

"Herbert" she demanded suddenly, "what are some of the signs of the times?"

"Keep Out. No Fishing. No Hunting. No Trespass," said Herbert.

Beef Grading Policy

Attracting Attention On The British Market, Report Shows

The beef grading policy of the Dominion livestock branch is not only providing a real service to the Canadian consumer and producer in clearly identifying the true quality of beef, but is also attracting attention in the British markets, a report shows. The Imperial Food Journal, a recognized authority on market conditions in the Old Country, says: "The new system of grading beef in Canada, whereby the two top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals."

Cattle For Old Country

Shipment Made During August Was Just For Experiment

On August 21st, for the first time in over three years, a shipment of Canadian cattle left Canada for the United Kingdom. This shipment of forty head is an experiment that will be watched with interest by western, as by eastern, cattle raisers and shippers. The purpose of the experiment is to determine whether the Canadian border has been closed to our animals. It becomes all the more desirable to revive the lapsed business with the Mother Country. It is promised that, if shipping facilities can be arranged, sixty thousand head of cattle will be shipped across the Atlantic this year. This is not the first time that the American Republic, by sudden change of mind, has forced us to look to the British family circle as an outlet for our farm products.

Co-Operative Wool Growers

Over 3,500,000 Pounds Of Wool Received At Toronto Warehouse

A recent check-up by the Canadian Co-operative Wool Growers shows that over 3,500,000 pounds of wool have been received at the Weston warehouse or are en route to that point this season. Another 200,000 pounds are expected to arrive. Since July 20 not one of these storms has done so. They have not vanished, inspection of Canadian records shows. They have been shifted farther north than usual, crossing the Hudson Bay region and providing the more ample rains which Canada has received. The wheat and corn belts of the United States have been left south of the storm track untouched by the moisture which might have brought rain.

In Business For 70 Years

The old village of Bath, near Kingston, Ont., where United Empire Loyalists settled more than 140 years ago, has a resident, Robert Mott, 81, who is still active, and who has been 70 years in business. He is still conducting a general store, assisted by his wife and son. From 1860 until 1900 he was in the harness-making business. Some of his forebears reached great ages, his grandmother being 101 and his grandfather 90.

Collect Data On Water Fowl

Many hundreds of voluntary observers throughout North America are collecting information concerning the numbers of water fowl observed on specified days each month. Reports for Canada are forwarded to the National Parks of Canada, Department of the Interior, Ottawa, and to the United States, to the Biological Survey, Washington.

He—"You just made the last payment on our house."

She—"Good. It's time we bought in a better neighborhood."

Honor Heroic Conductor

Tribute was paid recently by Colonel the Honorable Murray MacLennan, Minister of Finance and National Health, and Colonel C. A. Holodgett, Director-General of the St. John's Ambulance Association, to the heroic action of Clarence W. Leach, passenger conductor on the Canadian Pacific Railway between Ottawa and Montreal who, by his prompt action and presence of mind rescued a child from drowning in the Rideau Canal last June. Mr. Leach is shown standing third from the left and alongside him are the Minister, Colonel Holodgett and J. H. Hughes, C.P.R. representative at Ottawa. Presentation of the Honorary Testimonial of the Royal Canadian Humane Society was made in the Minister's office. Mr. Leach is insured.

Growing Respect and Good Will That Mark Relations Between Canada and the United States

A New Idea

New System Of Marketing Meat Known As The Rapid Freezing Method

Officials of the Dominion Livestock Branch are watching with interest the progress of the new system of marketing meat known as the "package meat" or "rapid freezing" method. It has already been successfully introduced in the larger retail distribution centres in the United States, and bids fair to revolutionize meat retailing methods in the British market. By the new process cuts of beef, mutton, lamb, pork and veal are dressed at the packing plant, packed in individual cellophane wrappers and subjected to rapid freezing at very low temperatures. It is found that by "marinating" only tiny ice crystals are formed in the flesh of the meat, preserving all its fine qualities quite unimpaired. The new system provides a serious threat to the future of that old familiar institution, the butcher shop.

(By Annette Worthington)

Winnipeg Newspaper Union

After the war Canada suffered a depression much as we did, and went through several bad crop years. But these were followed by four or five years of big crops and an impressive development in mining, hydro-electric power and industry generally. The United States is only one-tenth the population of the United States, she is indeed a power in her neighbor, and one whose bargaining salary is extremely great. One need mention only her control of the raw materials for the world's insurance companies attest to that.

Canada's population is sure to increase. Indeed, we are adding to it constantly. There is migration both ways, an interchanging of population on a great scale that can only make for mutual respect and good will in the case of Canada and the United States. There seems to be a mutual respect and good will on the part of the other. In this instance, business victories carry peace instead of war for fear of C. P. Few countries have such opportune associations, and yet one cannot but feel that the extension of these relations into the international field is to some extent possible.—Saturday Evening Post.

Cultivated Forage Crops

Progress Is Made In Pasture Improvement By Dominion Range Experimental Station

The Forage Crop Division of the Central Experimental Farm had a record year in 1929, as evidenced in the report of G. P. McNeill, Ph.D., Dominion Agronomist—an illustrated booklet of 46 pages. Amongst other things it is noted that considerable progress has been made on a large number of projects pertaining to range management and pasture improvement at the Dominion Range Experimental Station near Manby, Ont. The report states that alfalfa has been given, also, to other range areas and to the growing of cultivated forage crops in co-operation with a number of the farmers in the area throughout the Western Provinces.

Manitoba Egg-Laying Contest

White Leghorns led the Manitoba egg-laying contest at the Brandon Experimental Farm at the end of the 27th week. These birds, owned by J. R. Beer, of Brandon, had a total production record of 1,656.2 points and 1,684 eggs. Barred Rocks owned by F. E. Foster, of Lanes, Man., led for weekly production with 61.2 points and 45 eggs.

"Thank you for the balloon, uncle! I had such a good time!"
"That is what I said, but mother said I must thank you all the same!"
—Eileen Hunter, Madrid.

"Is this place healthy?"
"That! I couldn't wait when I came here."
"Did you have rheumatism?"
"No, I was born here."—Eileen Hunter, Madrid.

WHEN CHILDREN FRET

THERE are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot put away. But there's quick comfort in Calveol.

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever colic torments fretful constipation whenever there's any sign of sluggishness, Calveol has a good taste; children love to take it. Buy the genuine—with Calveol's signature on wrapper.

CHAPTER XXVII.

As those two in the doorway moved out of the mirror's line of vision, Grandma lifted compassionate eyes to Jimmy Bennett. She could not speak. Her throat felt parched. Anything she might say would seem inadequate; so it was in silence Jim arose and moved dazedly toward the door that led to the room beyond.

"I'll get out the back way," he managed to say huskily. "You tell her that George K. sent for me. Tell her anything you're a mind to—except the truth. I'll be all right after a minute. . . . Don't worry. . . . I'll . . ."

But he was too late. Charman was back, her eyes still shining as she glanced in bewilderment from Grandma's troubled countenance to the grim face of her old playmate.

"Where are you going?" she began, puzzled. "Come back, Jim. Sit down. I've got some news for you. What makes you act so queer?"

Then light broke in upon her and she cried: "Oh, look here! Did—did you see that idiot Jim?"

Her cheeks flamed, but Jim still stood in the doorway. He might have been a statue. He didn't speak; but Grandma answered shakily: "Is the mirror, dearie. I didn't know you cared that way—either of you. I thought . . ."

"I see," said Charman. She laughed, and going close to Jim, looked at him: "And you thought, too, Jim? Really, I don't know, but I blame you. It must have looked that way. That kiss—"

"You don't have to explain a kiss like that, Charman," Jim broke in gruffly. "It spoke for itself. I wish you happiness, of course; but now . . ."

"Uncle George is waiting for me, and . . ."

"The girl drew an exasperated breath. "Let him wait," she responded. "You shan't go one step, Jim Bennett, till I've made you and Grand-

ma understand this thing. Sit down. That kiss was—well, sort of a vicious kiss, you understand. It was a kiss by proxy, so to speak. It wasn't me John Carter was really kissing, but a girl who's crossing the ocean now to come to him—a girl he's adored for ages, though he was too proud to say so—nothing to offer her said: 'Oh, you know that Finnish line of thought.'"

"It's a long story, too long to go into now, but anyway, he wrote to her after the old doctor died and he thought he'd be able to get married. His letter came back unopened. Then he found from a friend that she had gone abroad. He wrote in care of the American Express, and that letter came back, too. Then he tried Paris and after following her all round Europe, the letter reached her in London, and she replied. It was that message he brought for me to see. She sailed at once. Told him to meet her at the dock with a marriage license! Do you wonder the poor boy was a little off his head? He's been half crazy with anxiety, and—well," said Charman, a smile curving her lips, "he just naturally had to kiss some one, didn't he?—and I was handy."

"Handy!" echoed Jim Bennett, staring. "Are you trying to tell me that if he'd run into Little Bessie at that time?"

"On his bit of humor was an heroic effort on Jim's part to clear the atmosphere. In reality, it was difficult for him to speak. But his words were rewarded by a smile from Grandma, and a dimple from Charman as she endeavored to reply sedately: "I'm not sure that he wouldn't have been—"

—know that?—Jim, I've been a—"

"I shouldn't hardly have thought it from the looks of things," said Grandma with unintentional humor. "At one time I was pretty sure we were going to keep him in the family. How long have you known about this girl, really? Why didn't you tell me?"

"If I'd known you were thinking what the Wickfield babybirds were thinking," replied Charman, "I would have told; but it was a confidence, and I saw no reason to violate it. I'm terribly close-mouthed about his own affairs, and he didn't know that the girl loved him. I think it was a mistake to let him go to talk to me, though it's my private opinion that he'd never have done so if he hadn't suspected what Wickfield was saying about it—"

"Did he think you were maybe getting to love him?" asked Grandma innocently.

"Charman flushed. "He's not so conceited as all that; but he was quite right to let me know that his heart's in the high-lands." He told me ages ago. In fact, he tried to tell me the day that Moore killed ruptured her appendix, but we were interrupted, and a week or so went by before he had another chance. I suppose all Wickfield thought that he broke my heart. Sometimes I wonder why he didn't. He's tremendously easy to love."

"Are you sure that useful organ is intact?" Jim questioned.

"Intact, but battered," confessed Charman. "Jim, where are you staying? You can put up here as well as not."

"I'm at Eudora and came over by automobile, just for the fun of surprising everybody. Aunt Salina never showed out when I was in at dinner time. I told her I wouldn't be back till after supper—thought if I hated hard enough I might worm an invitation out of somebody."

"You don't ever need to hint for an invitation here," said Grandma. "You're welcome to invite yourself any time you want. I've missed you like you, Jimmy, and I presume Charman has, too, though maybe she's too bashful to let you think so."

"She means 'madly,' Jim," laughed Charman, "and I fear I'm not even that. I've missed you abominably, and I don't mind saying so to your face. But if you're to stay—"

"What makes 'madly,' Jim?" asked Charman, "and I fear I'm not even that. I've missed you abominably, and I don't mind saying so to your face. But if you're to stay—"

"The girl drew an exasperated breath. "Let him wait," she responded. "You shan't go one step, Jim Bennett, till I've made you and Grand-

ma understand this thing. Sit down. That kiss was—well, sort of a vicious kiss, you understand. It was a kiss by proxy, so to speak. It wasn't me John Carter was really kissing, but a girl who's crossing the ocean now to come to him—a girl he's adored for ages, though he was too proud to say so—nothing to offer her said: 'Oh, you know that Finnish line of thought.'"

"It's a long story, too long to go into now, but anyway, he wrote to her after the old doctor died and he thought he'd be able to get married. His letter came back unopened. Then he found from a friend that she had gone abroad. He wrote in care of the American Express, and that letter came back, too. Then he tried Paris and after following her all round Europe, the letter reached her in London, and she replied. It was that message he brought for me to see. She sailed at once. Told him to meet her at the dock with a marriage license! Do you wonder the poor boy was a little off his head? He's been half crazy with anxiety, and—well," said Charman, a smile curving her lips, "he just naturally had to kiss some one, didn't he?—and I was handy."

"Handy!" echoed Jim Bennett, staring. "Are you trying to tell me that if he'd run into Little Bessie at that time?"

"On his bit of humor was an heroic effort on Jim's part to clear the atmosphere. In reality, it was difficult for him to speak. But his words were rewarded by a smile from Grandma, and a dimple from Charman as she endeavored to reply sedately: "I'm not sure that he wouldn't have been—"

—know that?—Jim, I've been a—"

"I shouldn't hardly have thought it from the looks of things," said Grandma with unintentional humor. "At one time I was pretty sure we were going to keep him in the family. How long have you known about this girl, really? Why didn't you tell me?"

"If I'd known you were thinking what the Wickfield babybirds were thinking," replied Charman, "I would have told; but it was a confidence, and I saw no reason to violate it. I'm terribly close-mouthed about his own affairs, and he didn't know that the girl loved him. I think it was a mistake to let him go to talk to me, though it's my private opinion that he'd never have done so if he hadn't suspected what Wickfield was saying about it—"

"Did he think you were maybe getting to love him?" asked Grandma innocently.

THE BENEFIT OF WRIGEY'S

Promotes good health when used regularly after every meal.

It cleanses teeth and throat, sweetens mouth and breath, and strengthens the gums.

Your health is added while your pleasure is served.

AFTER EVERY MEAL

Good and Good for you

supper you'll have to help to get it; and anyway, Grandma has talked enough for one while. You close your eyes. Grandma will get a cat-nap while we rustle the repast."

The young man arose with alacrity and Grandma said: "You get something good and hearty. Charman, Jim's hungry after his long journey. Maybe he'd relish one of your nice over-the-hill biscuits."

"This looks like an interesting one," Grandma, smiling the guests, "but I refuse to be treated as company."

He stooped to take the old lady's hand in a gentle grip that said, "All well after all," before he followed Charman to the kitchen.

"This looks like an interesting one," Grandma, smiling the guests, "but I refuse to be treated as company."

He stooped to take the old lady's hand in a gentle grip that said, "All well after all," before he followed Charman to the kitchen.

He stooped to take the old lady's hand in a gentle grip that said, "All well after all," before he followed Charman to the kitchen.

"This looks like an interesting one," Grandma, smiling the guests, "but I refuse to be treated as company."

er—well, with all the angles sand-papered. Do you catch my meaning? You'd love her, anyway. It was worth being edited all this time to find an aunt like that, believe me."

Was that all you found in California? queried Charman as she measured four into a blue bowl. He was remembering the "girl" mentioned in Lavinia Barker's letter, but Jim answered in all seriousness:

(To Be Continued.)

Body Of Andre Is Found

Remains Of Famous Swedish Explorer Recovered After 35 Years

Out of the Arctic silence has come the grim last chapter of aviation's first North Pole argosy, solving after 35 years the mystery of how Svalbard August Andre, Swedish balloonist-explorer, who set out in an airship, in 1897, for the top of the world, perished with his two companions.

A Norwegian scientific expedition, headed by S. S. von Knor, went west to Oslo that its members had found the bodies of Andre and his mates a camp of their making, on Wain Island, which lies east of the Spitzbergen group.

No trace of Andre's balloon had been found.

Andre's diary, his scientific instruments, a few scattered objects which evidently had been carried by bears but left untouched, and the bodies of the explorers told the gruesome tale of their halting, the elements in which the tall, blonde aeronaut had survived his fellow.

Andre was accompanied on his trip by K. Frankel and N. Strindberg, the latter then a handsome youth of 24, professor in a Swedish university, and his companion, but putting off his wedding until he might return from this one last expedition before he was married.

Despatches reaching Oslo did not readily identify the man whose body was found near that of Andre, and despite the fact that he was a Dane, Andre made his great Polar attempt from Dunes Island, Litch, and he had failed. He had launched the idea in 1895, thirty-one years before the epochal voyage of Amundsen and the "Norge" across the Pole, accomplished America's ideal.

Upon a desolate tableland, at the base of a high cliff some 500 feet high, the Norse explorers came upon the camp of death on August 6. To-day a Norwegian expedition, according to advices from the Horn party, was bringing the bodies and other effects of the explorers to Norway.

Perian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, delicious to the skin, it always results in complexion, delicately young and lovely. Indispensable to every daily toilet, it is unrivaled. Tones and stimulates the skin. Recommended also to soften and make the hands finely white.

Fast British Trains

Cheltenham Flyer Attains Speed Of 80 Miles An Hour

When I travel from Brighton to London at night, I see nearly always at Victoria Station a few young passengers admiring the huge and hubbub engine of the King Arthur class which has drawn the train. Big engines and famous trains are an inevitable attraction for youth—as you may learn at almost any station. British trains, as shown by the summer timetables, are the fastest in the world. The fastest of all is the "Cheltenham Flyer," which is timed to do the 77 miles from Brighton to London at 66 miles an hour, but actually covers the distance on many days at a speed of 80 miles an hour.

Nearly a century ago, Brunel, in this matter of speed was far ahead of his time. He thought 60 miles a rate to aim at. Those days were given a number of his contemporaries, who seriously favored the imposition of a speed limit of 15 to 20 miles per hour, "the safety of passengers."—London Daily Mail.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a headache, a cold, a sore throat; it will reduce the swelling from a sprain, relieve the most persistent nerve and will speedily heal cuts and contusions. It is a medicine chest in itself.

The dandelion's name comes from French words meaning lion's tooth, bestowed on the plant because of its tooth-edged leaves.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

"Some people have no initiative," says a writer, "they merely follow the lead of those with brains." Led by the nose.

Minnard's Liniment is a household friend.

ENO'S FRUIT SALT

The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be in delicious health is to be healthy. ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal. But remember, only ENO can give ENO results.

Wingless Aircraft

Successful Flight Of Latest Addition To Aircraft Is Reported

The New York Times says a wingless aircraft based on the principles of the celebrated Patino rotor plane, has been built and successfully flown on Long Island Sound, off Manaroneck, with the backing of New York capitalists.

The aircraft is described as similar in appearance to a seaplane without wings. A single motor in the center supplies the traction through a three-bladed steel propeller. An auxiliary air-cylinder, a copy motor supplies power to rotate the cylinders which take the place of wings.

Three rotors are in four sections, two on each side of the centre longitudinal line of the craft. Forward is an out-rigger rudder and behind is a small pair of tandem cockpits. Between the motor and the cockpits two long booms are used in place of the usual four longerons.

Wool Warehouse Destroyed

Half a Million Dollar Loss Occasioned By Fire At Weston

Damage estimated at \$500,000 was caused by a fire which destroyed a building of the Canadian Co-operative Wool Growers, near Weston, Ont. Charred and crumpled walls containing 3,000,000 pounds of water-soaked wool are all that remained of the structure after firemen had finally conquered the blaze. Officials were at a loss to determine the cause of the fire.

Most of the bugle calls used in the United States Army have been adopted from other countries.

PHILLIPS' PINKETTES

For Troubles due to Acid in the Stomach

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the alkali known for its gentle action is Phillips' Milk of Magnesia. It is the only one that has been used by physicians in the 50 years since its invention.

When Pain Comes

One spoonful of this harmless, tasteless alkali in water neutralizes excess acid in the stomach, and the symptoms disappear at once. You will never use crude metallic salts when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

PARLIAMENT OPEN ON MONDAY, SEPTEMBER 8

Ottawa, Ont.—Parliament will open on Monday, September 8. Official announcement of the date of opening was made by Sir George Perley, acting prime minister and war-time Canadian high commissioner in London, England.

The hour set for the opening, Sir George Perley stated, is 12 o'clock noon, although the more formal procedure will not take place until 3 o'clock in the afternoon. This arrangement will permit the House of Commons to get right down to business on the first day of the special session to deal with unemployment relief, and doubtless take some action on the tariff.

In view of the nature of the coming session, it will be somewhat different from the usual opening.

Members of parliament will assemble in the House of Commons at the noon hour, with Arthur B. Cahan, clerk of the House, presiding. After assembling, the members will proceed to the senate chamber, where the deputy speaker will be present, and upon the direction of His Excellency will return to the Commons to elect a Speaker. Adjournment will then be made until 3 o'clock, when, with the pomp and ceremony of tradition attendant upon the opening of parliament, Viscount Willingdon will arrive from Rideau Hall and proceed to the Upper Chamber. His Excellency Governor-General will read the Speech from the Throne.

The address in reply to the Speech from the Throne will be made by the mover and second, former Premier Mackenzie King will then speak, followed by Premier H. B. Bennett in his initial address on the floor of the House as prime minister. In all probability, Robert Gardiner, C.F.A., leader, will continue the debate while the House is in session.

Usually, the first session of a new parliament opens on a Wednesday and little practical business is performed that week. The opening is marked with a series of social functions at the beginning of each session; but this year, in keeping with the austere atmosphere of the session, there will be no state dinner or drawing-room reception.

Members-elect are expected to be in Ottawa early Monday morning. Notices are being sent out by the clerk of the House asking their attendance in the Parliament buildings after 9:30 o'clock on Monday morning, so that they may be sworn in. In view of the preliminary to be discussed, a full attendance of members of every group in the House is anticipated.

Wins Marathon Swim

Marvin Nelson, of Iowa, Annives 10,000 Price In Big Event

Toronto, Ont.—Marvin Nelson, a bronzed young Hercules, who had come up from Port Dodge, Iowa, won the 10,000 and the provincial swimming championship of the world. He swam the 15-mile course of the Canadian National Exhibition in seven hours, 43 minutes, 36 1/2 seconds, a new world's record, and climbed up on the finishing float still fresh and strong. Last year he was barred from the prize money when he collapsed, unconscious, with the end only 50 yards away.

In a race which saw the collapse of George Young, then swimming fourth; Frank Pettibone, second; and the lead; Mendel Burditt, Eli Radakovich, and many other famous swimmers, Nelson persisted to overtake one after another of the leaders, finally passing Lloyd Spender at the beginning of the last lap. In the last four miles he outdistanced all the rest, leading by 250 yards to finish 500 yards ahead of him.

Nelson's gesture of victory when he lifted both hands out of the water brought immediate response from the thousands massed along the lake-front. He was a champion of few words when welcomed by the mayor of Toronto and a battery of photographers. "All right, that's fine—I'm satisfied," summed up his feelings. He strolled about the float and the photographers' barrage without receiving any undue attention, and was the first to greet Lloyd Spender when the Port Colborne youth finished seven minutes after himself.

Money production in Canada totals more than 15,000 tons, valued at more than \$3,400,000.

W. N. I. 1853

Has Faith In Canada

Premier Brownlee Is Optimistic Over Future Of Dominion

Simcoe, Ont.—Speaking before the Simcoe Rotary Club, Hon. John E. Brownlee, premier of Alberta, and distinguished son of Norfolk, commented on the subject of immigration and unemployment in the province of Alberta.

Referring to the continued influx of immigrants to the West, he said: "They have been coming into the Peace River country at a great rate in the last couple of years. I can not continue to pour people into any country like that without experiencing a setback. The country again cannot assimilate them and it becomes a serious problem when an era of low prices and falling markets sets in. Many eastwarders have been unable to understand why Alberta wanted the ban up against immigration. The present situation affords the answer."

At the same time Premier Brownlee took occasion to refute newspaper reports of Red activities in Alberta. "You will find more Reds in the city of Toronto or the city of Hamilton in any day," he declared. "I would find them in our province in a year."

He defended the policy of the westward facing the pool in connection with marketing the wheat, asserting that the pool had always been expiring its life. "It is just one of the cycles," he said. "There is an over production in the basic commodities of life and the result suffers a temporary depression."

Premier Brownlee declared himself to be an optimist about the future. "It may be one month, two months, a year, or maybe more before conditions right themselves, but of the life of this country we can have no doubt."

Proposed Changes In Homesteading Policies

Will Be Presented To Government By Saskatchewan Commission

Saskatoon, Sask.—Findings of the Royal Saskatchewan Commission on Lands, and Settlement will be presented to the government, if acted upon, involve radical changes in the homesteading policies of the past. Dr. W. W. Swanson, chairman of the commission, announced.

One of the most interesting and important researches of the commission, he stated, dealt with vacant lands. Since the return of the natural resources to the provinces it became imperative to devise a program based upon sound policy for the development of these lands and the commission had attempted to do. Dr. Swanson would not indicate the nature of the suggestions.

Researches were made by the commission into the present condition of agriculture and the possibilities with a view to relating this to immigration and settlement.

Many other problems of rural and urban, had been studied so that the entire report comprises a comprehensive and detailed analysis of the basic problems affecting immigration, colonization and employment.

A Great Discovery

British Delights To Medical Convention Stress Value Of Insulin

Winnipeg, Man.—Insulin, discovery of a Canadian research expert, is one of the greatest advances in medical science, according to Sir William Taylor, K.B.E., C.B., of Dublin, Ireland, who is here attending the British Medical Association convention.

Diabetes mellitus, which had always proved fatal, particularly in children, could now be cured. Insulin had altered the whole treatment of the disease. "With the aid of insulin, I have been able to perform operations which I could not have dreamed of without it," declared Sir William.

Referring to birth control, Sir William expressed himself in favor of it insofar as it tended to raise health standards. "It is a good deal better to exercise control than to allow a super-abundance of children to be brought into the world who cannot be properly educated, or properly fed," he commented.

Air Mail From Iceland

First Delivery Made To Halifax By German Flyers

Halifax, N.S.—The first air mail delivery from Iceland to Canada arrived here August 25, in the custody of Captain Wolfgang Von Gronau and his companions aboard the "Lofoten," a German mail ship, after a flight from Greenland to Iceland, Greenland and Labrador, Captain Gronau delivered the mail to T. A. King, postmaster here.

INITIAL PAYMENT OF POOL IS SET AT SIXTY CENTS

Winnipeg, Man.—Days of anxious waiting are over and now the 150,000 acre Canadian wheat pool, of the prairie wheat pools, know what the initial payment is to be on the 1930 crop.

It will be the lowest in the seven-year history of the pool: 60 cents a bushel on wheat; oats, No. 2, C.W., 35 cents; barley, No. 3, C.W., 30 cents; rye, No. 2, C.W., 30 cents; and flax, No. 1 N.W., \$1.25. The 60 cent payment on wheat will be made on the basis of No. 1 Northern Grade at Port William.

Along with the official announcement from A. J. McPhail, chairman of the Canadian Co-operative Wheat Producers Limited, the central selling agency of the pools, and from Premier John Bracken, of Manitoba, came a plea to the creditors of the western agriculturists to be lenient. The same plea was made in Regina, at a conference of wheat growers, business men, and members of the Saskatchewan Government, under the leadership of Premier J. T. M. Anderson.

Both Mr. McPhail and Mr. Bracken drew attention to the serious situation facing the prairie farmers, who, for the second year in succession, in face of depressed world grain values, are now being asked to pay below the average in yield.

"The government of Manitoba," said Premier Bracken, "believes that in the present emergency conditions and financial interests should refrain from unduly pressing collections from farmer debtors. It is in the interests of all Canada that our farmers should not be embarrassed by too energetic attempts by competing creditors to collect large payments than farmers are able to pay." Sale of the prairie crops "under pressure" would depress values, with serious consequences to the agricultural and business interests of the Dominion, he said.

Mr. McPhail declared: "As the welfare of our prairie provinces is almost entirely dependent on the solvency of our agricultural industry, we hope and feel confident that all interests concerned in the welfare of western Canada will co-operate in minimizing the difficulties our farmers are facing at the present time."

The chairman of the central selling agency stated that a further payment of the pool would involve an increase in the initial payment "which will be made at an early date as market and financial conditions will permit."

Since the formation of the wheat pool in the west, with the exception of one year, the initial payment has always been \$1 a bushel. In 1928, values were depressed, the initial payment was 85 cents a bushel.

Burns' Descendant Sings Poet's Ballads

Robert Burns, the famous Scottish poet, has a descendant in the person of Mary Young, who has just been born to her parents, James and Mary Young, and they had nine daughters, of whom Jane Burns was one. Jane came to Canada, where she married, and her youngest daughter Mary was the grandmother of Robert Burns.

It is interesting to note the resemblance as evidenced by comparison of photographs of Miss Gray and Robert Burns.

NEW CABINET MINISTER

Dr. Murray McLaren, new minister of pensions and national health in the Bennett cabinet, who is a native of New Brunswick, with a very distinguished career.

Government Steamer Nearing Winter Harbor

"Boothie" Battling Ice and Fog In Arctic Sea

Ottawa, Ont.—After a continuous battle with ice and fog, the Canadian Government Arctic patrol steamer "Boothie" is approaching winter harbor on Melville Island, it was announced by officials of the North West Territories branch of the Department of the Interior.

The ship is carrying the 1930 Arctic expedition which will spend some time among the Canadian Archipelago. Its immediate purpose is to re-provision the cache on Melville Island established there in 1908 by Capt. J. E. Bernier, of the C.G.S. Arctic, which has played a most important part in the exploration of the Arctic and the policing of Canada's northern empire.

Preserving Wild Life

Canada Adopts Of States Especially In regard To Buffalo

Toronto, Ont.—That Canada has gone much further than the United States in some aspects of wild life preservation, particularly the conservation of buffalo, was the statement made by Colonel Paul G. Redington, chief of the U.S. Bureau of Biological Survey, who addressed the 24th annual convention of the Ontario Hotel, of the International Association of Game Fish and Conservation Commissioners.

Devise Proved Successful

Detroit, Mich.—A parachute device to bring aeroplanes safely to the ground in emergency cases, operated successfully in a test conducted here. The apparatus, carried in a tube beneath the fuselage, lowered a plane from a height of 2,000 feet over Grosse Ile airport.

The effect of the action will be to ensure that the United States fruits and vegetables covered pay duty on what is considered a fair valuation.

Comparison of the values fixed on fruits and vegetables with those fixed herefor is practically impossible because of variations which have existed in different parts of Canada. As a result, for instance, might enter Canada at a lower value for duty purposes in the maritime provinces than in the interior.

The agitation for application of the dumping duties on fruits and vegetables naturally emanated from those sections of Canada where these commodities are largely produced.

The fruits and vegetables upon which the valuation has been fixed together with their values for duty purposes when entering Canada from United States are as follows: Apples, six cents per pound; cabbage, five cents per pound; cantaloupes, thirteen cents per pound; cherries, ten cents per pound; citrus fruits, four cents per pound; peaches, twelve cents per pound; pears, nine cents per pound; plums and prunes, eight cents per pound; tomatoes, ten cents per pound.

The fruits and vegetables upon which the valuation has been fixed together with their values for duty purposes when entering Canada from United States are as follows: Apples, six cents per pound; cabbage, five cents per pound; cantaloupes, thirteen cents per pound; cherries, ten cents per pound; citrus fruits, four cents per pound; peaches, twelve cents per pound; pears, nine cents per pound; plums and prunes, eight cents per pound; tomatoes, ten cents per pound.

Climbers Conquer Mount Robson

Members Of Mount Everest Expedition Reach Summit

Mount Robson, B.C.—Mount Robson, after many attempts has been climbed for the first time this season. A party, composed of N. E. Odell and G. Crawford, of London, England, both members of the Mount Everest expedition, and Terri Moore, of Middletown, N.Y., successfully gained the summit.

It was in a lone attempt to climb Mount Robson, 12,972 feet high, the highest peak in the Canadian Rockies, that Newman D. Waff, of Orange, N.J., lost his life recently.

Still Fighting By-Elections

No Immediate Possibility Of Law Being Amended

Ottawa, Ont.—Political observers have no immediate possibility of amending the elections law to obviate the necessity of cabinet ministers going before the electors at by-elections, they assume office.

Two or three years ago a resolution was read in the House of Commons recommending that by-elections for cabinet ministers be dispensed with. The government of the day promised to give consideration to it and no vote was taken. It is one province that has eliminated by-elections for its ministers.

TARIFF ACTION TO PROTECT THE FRUIT GROWERS

Ottawa, Ont.—The dumping of fruits and vegetables from the United States into the markets of Canada, which has been the cause of serious protest for some time past, has resulted in debate action at the tariff board.

Hon. E. B. Ryckman, Minister of National Revenue, has announced the fixing of values for duty purposes on ten fruits and vegetables which are among the common food commodities on the Canadian table.

The fixing of value for duty purposes means that such fruits and vegetables entering Canada must pay a duty on the basis of the valuation determined by the minister.

Provisions of the Customs Act permit the government to fix valuation on commodities entering Canada. If they consider such action of strategic importance, the duty on the House of Commons, as well as outside parliament, the claim has been made by representatives of the Canadian fruit and vegetable growers that the "cream of the Canadian market" for such goods is being lost.

They are in a position to bring forward their product earlier than it would be produced in Canada. There was also the claim that when the United States market was satisfied, fruit, which would otherwise have glutted that market, was dumped into Canada at a much lower price than prevailed either in United States or Canada. This, it was claimed, constituted unfair competition which the Canadian producer could not be expected to meet.

Canada's fruits and vegetables from United States have grown to considerable proportions of late years. The Canadian market has proven attractive to the producers in United States who could get their product into Canada before the home-grown fruits and vegetables were available.

The effect of the action will be to ensure that the United States fruits and vegetables covered pay duty on what is considered a fair valuation.

Comparison of the values fixed on fruits and vegetables with those fixed herefor is practically impossible because of variations which have existed in different parts of Canada. As a result, for instance, might enter Canada at a lower value for duty purposes in the maritime provinces than in the interior.

The agitation for application of the dumping duties on fruits and vegetables naturally emanated from those sections of Canada where these commodities are largely produced.

The fruits and vegetables upon which the valuation has been fixed together with their values for duty purposes when entering Canada from United States are as follows: Apples, six cents per pound; cabbage, five cents per pound; cantaloupes, thirteen cents per pound; cherries, ten cents per pound; citrus fruits, four cents per pound; peaches, twelve cents per pound; pears, nine cents per pound; plums and prunes, eight cents per pound; tomatoes, ten cents per pound.

ROAD TO LONG LIFE IS SHOWN BY MEDICAL MEN

Winnipeg, Man.—"Long life and good health," Out of the bow of the world's medical knowledge, a toast was made to the health of the nation at a meeting of the British Medical Association. Two of Britain's most noted physicians took the platform before hundreds of their fellow doctors; one to point the road to a long life, and the other to say that good health is unobtainable.

Dr. Robert Hutchison, F.R.C.P., London's most noted locum tenet when health fails are the duties, shattered images right before him. Jovially, but firmly, the British expert harked back to the good old days of mud-brick houses, when children were probably healthier and happier than the over-weighted, pampered, dieted, psycho-analyzed infants of today.

He laughed at caloric-counts and vitamin-givings, and held up as ideal the easy-going individual who merely needs to be healthy.

Inability of the state to permit birth control in England was decried by Dr. J. C. M. B. F.R.C.P., in outlining the way to a lengthy life. He considered heredity by far the most important factor in determining longevity, but regretted that lack of birth control permitted reproduction of far too many of the unfit.

"Good Equipment Makes a Good Farmer Better."

Local and General

Mr. and Mrs. Graf left for Taber on Tuesday, where Mrs. Graf's sister resides.

T. Turner of Edmonton was the guest of Mr. and Mrs. P. O. Sommers over the week end.

Regular dance starts again this Saturday night, with Len Davis and his Royal Arcadians.

Mrs. J. M. Moffatt is in Calgary and will attend the wedding of Miss Marjorie Eoli on Saturday.

Mrs. F. Wise and Miss Barbara returned home this week, having spent two months visiting in the States.

Mrs. F. Clever was hostess at a dinner party on Saturday evening, in honor of her husband's birthday.

Geo. Lobban of Calgary, who has been in the vicinity for the past three weeks, returned home on Thursday.

Dressmaking, plain sewing and all kinds of mending at very reasonable prices. For further information phone 74.

Mrs. W. E. Watkins and Miss Catherine returned recently from a trip to Seattle, where they visited with Mrs. Watkins's sister.

The Women's Institute is to meet on Sept. 9 at the home of Mrs. Fred Smith. Roll Call—Early portrait of husband. Refreshment convener, Mrs. E. Latiff.

K. R. McLean, R.O. of McLean & Anderson, Sight Specialist 208-8th Ave West, Calgary will make his monthly visit to Champion Friday, Sept. 20th. at the Drug Store.

Born—At Oakland, Cal., on Sunday, August 24th to Mr. and Mrs. John Dillingham, a son. This event places Mr. and Mrs. Wm. Ulrich definitely as grandpa and grandma.

The committee in charge of the aprons for the bazaar wish to remind those who have aprons and are donating them, to remember that the time is passing and to be sure and have them finished. They may be handed in to Mrs. U. G. Anderson.

Mr. Graf wishes to thank the many patrons and friends in Champion with whom he has had such pleasant relations during his stay in town and expresses the hope that the million bushel signs at both sides of town will read "over two millions" in the near future.

Miss Ruby Graham resumed teaching her music class on Sept. 5th.

Miss Rae Wilson will resume her regular visits here, beginning Monday, Sept. 8.

Mrs. C. Williamson and Miss Ada returned from a two months' visit at Brantford and other points in Ontario.

F. V. Sleson has taken the agency for the Empire Cleaning and Dyeing Co. of Calgary. High class work guaranteed.

Between airplanes, freight and passenger trains, trucks and autos, there is almost a constant zoom and clamor for some eighteen out of the twenty-four hours. Still, although the noise is sometimes objectionable, it is a matter of regret that it don't last the year round. This next week will see the end of the biggest part of the rush of harvest and threshing.

There have been several very warm afternoons during the week, but the weather was ideal for harvesting purposes.

Miss Gladys Rhodes wishes to announce that she is qualified to instruct a limited number of beginners for Violin Tuition.
